^{*} Revenues represent the value added to soy at each stage. This avoids double-counting the value of preceding stages.

Total National Results

The national soybean sector has a total impact on America's economy of almost \$116 billion – the equivalent of more than 0.65 percent of the U.S. GDP, and up to 9 percent of the GDP for certain states.

- To perform this analysis, LMC estimated direct impacts and then applied multipliers from the U.S. Department of Commerce Bureau of Economic Analysis, which prepares them for 369 detailed industries.
- Jobs are presented on a full-time equivalent basis, so a seasonal worker is counted as part of a job.
- The state numbers do not add up to the totals, because several small impacts are not displayed.
