

November 6, 2015

The Honorable Mitch McConnell  
Majority Leader  
United States Senate  
Washington, D.C. 20510

The Honorable Paul Ryan  
Speaker  
United States House of Representatives  
Washington, D.C. 20515

The Honorable Harry Reid  
Minority Leader  
United States Senate  
Washington, D.C. 20510

The Honorable Nancy Pelosi  
Minority Leader  
United States House of Representatives  
Washington, D.C. 20515

Dear Majority Leader McConnell, Speaker Ryan, and Minority Leaders Reid and Pelosi:

Over the past year, thousands of elected officials, community groups, employers, state agencies and other stakeholders urged the Environmental Protection Agency (EPA) to maintain the existing ozone National Ambient Air Quality Standards (NAAQS) of 75 parts per billion (ppb). These commenters highlighted the economic harm that would result from a lower ozone standard and that air quality has and will continue to improve without this regulation. Indeed, since 1980, ozone levels have decreased 33 percent and this trend will continue from investments and policies already in place. Nevertheless, on October 26, 2015, EPA promulgated a new, stringent ozone NAAQS of 70 ppb. Without immediate Congressional action, EPA's new rule will negatively impact our economy and stifle growth in many parts of the country. The undersigned organizations strongly encourage members of the House of Representatives and the Senate to listen to the concerns of their communities and stakeholders and protect our nation's recovering economy by taking necessary legislative steps to mitigate the rule's most harmful economic consequences while continuing EPA projected improvements to ozone air quality.

The severe economic impact of nonattainment designation on local economies and businesses has been well documented by the thousands of comments and letters submitted to the Administration, numerous Congressional hearings, and analyses from nonpolitical, nonpartisan research groups and organizations. EPA's own data indicate that 217 counties do not attain the current 75 ppb standard, and that the number could swell to 958 counties under the revised standards, subjecting large parts of the country to costly nonattainment control requirements. We are concerned by the hardships this rule will cause our businesses and local communities and question the necessity of this action when EPA projects that nearly the entire country will attain the standards by 2025 under existing federal and state controls, including those yet to be implemented for the 2008 standard.

EPA's new, stringent ozone NAAQS are already the subject of bipartisan concern. We therefore encourage members of both parties and Chambers to work together to develop a solution that reduces the resulting economic hardship while still maintaining intended air quality improvements.

Sincerely,
