*The national soybean sector has a total impact on America's economy of almost \$116 billion — the equivalent of more than 0.65% of the U.S. GDP, and up to 9% of the GDP for certain states.*

- To perform this analysis, LMC International estimated direct impacts and then applied multipliers from the U.S. Bureau of Economic Analysis, which prepares them for 369 detailed industries.
- Jobs are presented on a *full-time equivalent* basis, so a seasonal worker is counted as part of a job.
- The state numbers do not add up to the totals, because several small impacts are not displayed.
